1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the claims

Claims 1, 3, 4 and 6-12 have been cancelled

Claim 13, line 1, --optical part—has been inserted before “insert”; line 4, “an” has been changed to –the optical part--; line 9, after “source”, -- while the insert rests against the molding surface of the mold cavity – has been inserted

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Brueggemann on April 20, 2007.

3. The following is an examiner's statement of reasons for allowance:  
Upon updating the search, Swanson US Patent 4,751,02 was uncovered, such patent seen to be the closest piece of art to the instant claims. It discloses using radiant heat to heat a plastic or metal insert, the insert either being in the mold or outside of it during the heating and injecting or extruding material into the mold to combine with the insert. However, the insert is not an optical part insert which is preferentially heated by the

energy, and the insert does not have a curvature measurably different from that of the molding surface. It is for these reasons that the instant claims are being allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
